BeyondTrust

BEYONDTRUST PAM APPLIANCES

SAFEGUARD SENSITIVE DATA UNDER THE TRUSTED SECURITY MEASURES YOU ALREADY HAVE IN PLACE

BeyondTrust® offers a full line of privileged access management appliances. These appliances provide multi-platform network discovery, centralized policy enforcement, least privilege enforcement, automated risk assessment, and powerful reporting, compliance, and regulatory audit capabilities.

PAM Appliances

- **BeyondTrust UVM20 (Physical):** The BeyondTrust UVM20 Security Management Appliance delivers pre-installed and pre-configured privileged access management capabilities, combining BeyondTrust's Password Safe, Privilege Management for Windows, and BeyondInsight for Unix/Linux (BIUL) under the BeyondInsight™ centralized management, reporting, and analytics console. This single-unit, rack-mount appliance reduces the time to implement integrated privileged account, compliance, and incident management capabilities across the enterprise.

- **BeyondTrust UVMv20 (Virtual):** The BeyondTrust UVMv20 Security Management Appliance is a pre-installed and pre-configured virtual appliance for privileged access management, with all the capabilities of the UVM20 rack-mountable appliance. This virtual appliance is fully licensed and is available for Microsoft Hypervisor-V and VMware ESXi and NSX.

- **BeyondTrust UVM50 (Physical):** The BeyondTrust UVM50 is a single unit, rack-mounted appliance offering the same privileged access management capabilities as the UVM20. However, the UVM50 can also be deployed as a multi-role appliance for granular, distributed functionality and enhanced scalability to meet the demands of any enterprise environment.

- **UVM20 SQL Free (Physical) and UVMv20 SQL Free (Virtual):** The BeyondTrust UVM20 SQL Free Appliances offer the same benefits of a UVM20, but provide a more cost-effective option for customers that wish to use an external database. The UVM20 SQL Free can also be deployed as a multi-role appliance for granular, distributed functionality and enhanced scalability to meet the demands of any enterprise environment.

- **BeyondTrust UVM (Cloud):** All the features found in the physical and virtual BeyondTrust UVMs are also available in the AWS, Azure and Google Cloud Marketplaces.

Rapid Deployment
Deploy and begin scanning in under 15 minutes

Turnkey, Comprehensive PAM
Everything you need for centralized privilege management comes preinstalled, pre-configured, pre-tuned, and pre-licensed

Low Total Cost of Ownership
Buy the BeyondTrust appliance once, then get support and upgrades for a low, annual maintenance fee

Simplify integrations, enhance user productivity, and maximize IT and security investments with BeyondTrust PAM appliances.

Functionality	UVM20 SQL Free	UVM20	UVM50
Appliance Type	*Physical or Virtual*	*Physical*	*Physical*
BeyondInsight and other BeyondTrust Products	✓	✓	✓
Hardened Operating System	✓	✓	✓
Includes SQL Database		✓	✓
Installs as a Distributed Appliance	✓	✓	✓
Includes Remote Access Controller	*Physical Only*	*Physical Only*	✓
Includes BeyondTrust Standard Support	✓	✓	✓
Supports SQL Cluster			
Capacity			
Maximum Managed Objects	20,000	20,000	50,000
Maximum Password Safe Concurrent Sessions	300	300	600
Maximum Privilege Management Agents	5,000	5,000	12,500

By investing in the BeyondTrust Appliance, you eliminate the monthly fees of software-as-a-service, lowering total cost of ownership over time.

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering companies to secure and manage their entire universe of privileges. The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance.
